Approved Processes	8
Rimfire to Centerfire Conversions	8a
Approved Barrel Processes	8b
Miscellaneous Approved Barrels	9

IMPORTANT NOTICES.

READ CAREFULLY!

- (1) All firearms, barrels, and processes listed in this document are approved by the Board of Directors for use in shooting activities of the North-South Skirmish Association, Inc. They have received “production approval”, which means that they, as manufactured, are approved for skirmish use. An arm or barrel which has been altered or modified must be submitted to the Small Arms Committee for individual approval and must be issued a Small Arms Committee approval card before it can be used in a skirmish. ***It is the responsibility of the skirmisher to find out if planned or executed changes might void the existing approval of an arm or a barrel, and to submit altered production arms and/or barrels to the Small Arms Committee for consideration.*** If you are considering making any changes to an approved arm or barrel it is good practice to discuss it first with a member of the Small Arms Committee.

- (2) The Small Arms Committee must individually approve custom-made arms for which the maker does not have production approval, and a Small Arms Committee approval card must be carried for that arm as evidence of that approval. Failure to have an approval card for a non-production-approved replica firearm will cause the disqualification of the shooter and/or the shooter’s competing company, with appropriate penalties. ***It is the responsibility of the skirmisher to submit any custom-built arm for which there is no production approval to the Small Arms Committee for consideration.***

- (3) In this, and all other documents and publications of the North-South Skirmish Association, Inc., the terms “approval” and “approved”, when applied by the N-SSA or its representatives, mean that the item to which the term is applied has been determined to meet the dimensional, configurational, functional, and historical criteria of the N-SSA, Inc. It does not in any way imply or guarantee the safety or the integrity of any firearm, barrel, or process.

Notes to users:

1. “Makers” may include manufacturers, importers, and/or vendors.
2. Replica Arms Company is now owned by Navy Arms Company, and its approved products now carry Navy Arms Company markings.
